Accounting period: 01.01.2024 bis 31.12.2024

Accounting subject: System boundaries: Cradle-to-gate The cradle-to-gate approach encompasses the environmental impacts from the extraction of the necessary raw materials to the provision of the finished product within the company premises. For waste disposal, the highest weight value was used as the basis for the waste quantity. Downstream processes, such as distribution, transport to the customer, product lifespan, and disposal, are not considered. VegaSystems fully offsets its total CO2 emissions through goldstandard.org

## *Emissions & Description of the Balance Room*

Balance standard: This certificate is to be understood as a self-declaration of the company. Depending on the self-selected system limit, the balance represents the sum of all direct and indirect greenhouse gas emissions of a company/site/process/product, expressed in CO2 equivalents (CO2e). The balance sheet is drawn up in accordance with the requirements for the quantitative determination and reporting of greenhouse gas emissions in accordance with the self-selected regulation or standard.
