Advantages of our hosted exchange email solutions for companies

Get started now with the professional email solution Microsoft Exchange!

Hosted Exchange offers companies many advantages when it comes to collaborative work between internal and external employees. With ActiveSync you can share email accounts across devices so you have access to your email at all times.

One advantage is access with your Outlook client. The appointment calendars for meetings or gatherings are also easy to organize. Address books can be managed securely and many other functions of the Exchange license are available to you.

Secure hosting of your data in Germany

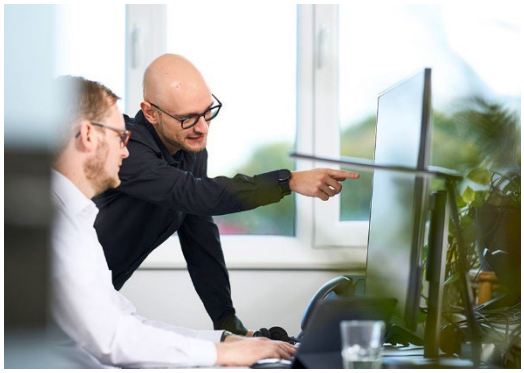
Trust Seal
www.teletrust.de/itsmig

When it comes to security, you are in good hands with Hosted Exchange.

We host in our own highly secure Tier3+ data centers in Germany. Built according to the modern standard DIN EN 50600, with certified operation by TÜV Rheinland according to ISO 27001.

In the event of an emergency, our professional employees are there for you around the clock and will be happy to help.

Professional spam & virus protection



The threats to companies from malware, viruses and phishing are constantly increasing. Professional spam and virus protection is therefore essential for security reasons.

Our hosted exchange products already include our premium protection against such threats.

Our premium spam and virus protection is constantly being developed and offers you the necessary security as standard.

GREEN hosting VegaSystems

Sustainable Hosted Exchange – IT with a clear conscience

With a PUE value of less than 1.08, our modern data centers are among the most environmentally friendly data centers in Germany.

We only use green electricity, which we generate ourselves on site using our own photovoltaic systems or which we receive from service providers with full compensation for CO2 emissions. Our data centers are located in one of the largest wind farm areas in Germany and are therefore usually physically powered by wind energy.

In addition, we work with heat recovery from the waste heat from our servers in our data centers. This waste heat is used efficiently to heat office buildings.

We have also installed additional circular economic cycles for our premium hardware, from high-performance applications to recycling.

With our products you can therefore reduce your company's own CO2 footprint.

Flexible Terms and Billing Options

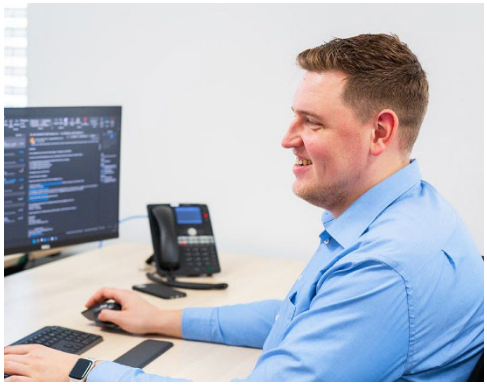
We offer maximum flexibility with regard to contract terms and billing periods. By default, our products include monthly billing with an annual contract term. Depending on individual arrangements, we also offer monthly, quarterly, or annual contract terms and billing.

Do you have any questions about our Hosted Exchange?

We are available for you during our opening hours and will be happy to work with you to create an individual offer.

You can reach us by phone at 05251/14854-0 or by email at info@vegasystems.de.

Talk to us today!



Do you need advice on other IT projects?

With our sustainable server housing, web hosting or cloud products, we also offer you the best performance and highest security standards in other IT products.

* All prices plus VAT. All offers are aimed exclusively at traders. Our terms and conditions apply. For terms of less than 12 months, a setup fee of €19 applies. A tariff change is possible at any time.

[2] Automatic extension of the contract term; termination must be made 30 days before the end of the contract.
